This FIG will take an interdisciplinary approach to examining current issues in health care and the delivery of care in various settings to diverse populations. “Health Care Systems: An Interdisciplinary Approach” (Nursing 105) will focus on factors affecting health and the value placed on health, the delivery of health care in different settings, and the roles of various professionals in the health care system.

- “Human Development in Infancy and Childhood” (Education Psychology 320) is a course that focuses on physical, mental, social, and emotional behavior from infancy to late childhood.
- “Introduction to Cultural Anthropology” (Anthropology 104) involves cross-cultural comparisons of social organization, economics, politics, language, religion, gender, and other issues.
- *Chemistry 108, “General Chemistry,” is an optional fourth course in this FIG.*

**Please note:** This FIG is designed for students considering applying to the Nursing Program in the School of Nursing; courses in this FIG have been carefully selected to fulfill requirements for the Nursing Program. However, students should recognize that entry to the School of Nursing is dependent on a number of factors including completion of specific courses and meeting minimum GPA requirements. Students interested in the Nursing Program are strongly advised to meet with an advisor from the School of Nursing in order to get information about that program.
This FIG is a total of 8 credits or 13 credits with the optional chemistry class. Students will need to take a 12 credit minimum to be a full-time student.
