Nursing: Calling the Shots in Health Care Delivery

(Option 2)

FIG 48

This FIG will take an interdisciplinary approach to examining current issues in health care and the delivery of care in various settings to various populations. “Health Care Systems: An Interdisciplinary Approach” (Nursing 105) will focus on factors affecting health and the value placed on health, the delivery of health care in different settings, and the roles of various health care workers.

- Sociology 160, “Human Sexuality: Social and Psychological Issues,” deals with social, psychological, and sociological aspects of sexual relationships and behavior, including the social psychology of physiological and emotional arousal, interpersonal attraction, and societal regulation of intimate relationships. This course presents theoretical and empirical material on sexual behavior, including premarital relationships, contraceptive use, and sexually transmitted diseases.

- English 100, “Freshman Composition,” focuses on building strong writing and research skills that will be useful in completing assignments in this and other courses in this FIG, as well as in future college courses.

- Chemistry 108, “General Chemistry,” is an optional fourth course in this FIG.

Please note: This FIG is designed for students considering applying to the Nursing Program in the School of Nursing; courses in this FIG have been carefully selected to fulfill requirements for the Nursing Program. However, students should recognize that entry to the School of Nursing is dependent on a number of factors including completion of specific courses and meeting minimum GPA requirements. Students interested in the Nursing Program are strongly advised to meet with an advisor from the School of Nursing in order to get information about the program.
This FIG is a total of 9 credits or 14 credits with the optional chemistry class. Students will need to take a 12 credit minimum to be a full-time student.
