FIG 51

This FIG will take an interdisciplinary approach to examining current issues in health care and the delivery of care in various settings to diverse populations. “Health Care Systems: An Interdisciplinary Approach” (Nursing 105) will focus on factors affecting health and the value placed on health, the delivery of health care in different settings, and the roles of various professionals in the health care system.

- Sociology 138, “The Sociology of Gender,” is a sociological examination of the status and roles of women and men in society, including the experiences of marriage, parenthood, employment and occupational attainment, socialization into sex roles and cultural reinforcement of these. Attention will be given to both existing patterns and change in those patterns.

- Rehabilitation Psychology 300, “Individuals with Disabilities,” is an overview of the characteristics and problems of exceptional children and youth. Topics include definition and classification systems, etiology of handicapping conditions, educational services, and adult adjustment. Current controversies and future trends will be discussed.

- *Chemistry 103, “General Chemistry,” is an optional fourth course in this FIG.*

Please note: This FIG is designed for students considering applying to the Nursing Program in the School of Nursing; courses in this FIG have been carefully selected to fulfill requirements for the Nursing Program. However, students should recognize that entry to the School of Nursing is dependent on a number of factors including completion of specific courses and meeting minimum GPA requirements. Students interested in the Nursing Program are strongly advised to meet with an advisor from the School of Nursing in order to get information about that program.
This FIG is a total of 8 credits or 12 credits with the optional chemistry class. Students will need to take a 12 credit minimum to be a full-time student.
