Interdisciplinary Courses (L&S) 215

Communicating About Careers

LINKED CLASS

Gender and Women's Studies 103

Women and Their Bodies in Health and Disease

The main FIG seminar, **Interdisciplinary Courses (L&S) 215: “Communicating about Careers,”** explores the meaning and value of a liberal arts and sciences education for careers in the global, technological, and multicultural workplace of the 21st century—regardless of your major. Through a series of individual

and collaborative research and communication assignments that meet the learning objectives of the Communications B general education requirement, you will learn to critically analyze the career and education implications of a diverse and digital workplace, and to critically reflect on your own strengths and values as you prepare to connect your college work with lifelong career success. The special discussion section associated with this FIG will focus specifically on careers in the health professions. The content of the linked course will also inform our understanding of this topic.

Gender and Women's Studies 103: “Women's Bodies in Health and Disease” — This class examines both physiological and social

processes relating to gender and health across the lifespan among cisgender, transgender, and non-binary individuals. Examples of topics include hormonal processes, reproductive anatomy and physiology, sexuality, sexual pleasure, chronic illness, depression, and sexual violence. A primary objective is for students to connect information about their bodies and personal health to larger social and political contexts. In particular, the class considers how health and health disparities are shaped by multiple kind of social inequalities, particularly inequalities based on gender. ●

Enrolled in a FIG and you change your mind?

FIG classes are designed to be taken together. When you enroll in a FIG, you are signed up for these classes as a whole group, not as separate classes.

Dropping one FIG class means ending your enrollment in all of the classes in the FIG.

So, here's what you should know if you want to drop the FIG:

- You can drop all the classes on your own at enroll.wisc.edu. Any non-FIG class will not be affected.
- After classes begin, if you need to drop a single class within the FIG, please contact Kari Fernholz (see below) to review your situation. If necessary, she will provide the required authorization to drop the class.
- **Wednesday, January 29, 2019** is the last day to drop a class without it appearing on your college transcript.
- **Friday, January 31, 2019** is the last day to add a class without first getting department permission.
